

LIFE GREEN VALLEYS

LIFE Green Valleys is a LIFE project close to Brussels. A second region is situated in the western part of Poland. The main targets of the project are the restoration of wet habitats (6510, 7230) and woodlands (91E0*, 9160); finding useful solutions for the biomass created by the management of the nature reserves; involving stakeholders and improve tourist and recreation facilities.

Purchase 56 ha of land

110 ha restored wet open habitats (6510, 6430, 6410, 7230)

Multi-stakeholder approach

3 ha restored aquatic habitats (3140)

Use of biomass

1,5 ha restored 6230*

85 ha restored forest (91E0*, 9160 and 9120)

Research of bats, monitoring of great crested newt and Desmoulin's whorl snail

THIS FLYER IS PRINTED ON PAPER MADE FROM GRASS FROM OUR OWN NATURE RESERVES.

GREAT CRESTED NEWT

DESMOULIN'S WHORL SNAIL

These nature reserves are part of the Natura 2000-network of European important nature reserves and receive financial support of the LIFE-fund of the European Union.
